

Anuri Onyeukwu

Product Manager

Port Harcourt, Nigeria | onyeukwuanuri001@gmail.com | linkedin.com/in/anuri-onyeukwu | onyeukwu-a.github.io

SUMMARY

Product manager who turns unclear problems into focused products that teams can build and users trust.

Experienced in taking a product from early concept to a scoped first release through user research, prioritisation, roadmapping and clear product requirements, working closely with design and engineering. Cybersecurity training brings risk, privacy and compliance thinking into product decisions from the start.

EXPERIENCE

Cofounder & Chief Product Officer

TagGrid Digital Services Limited, Port Harcourt | Jul 2026 – Present

- Took a digital identity and payments product from early concept to a scoped first release, cutting a long feature plan down to what users need first.
- Own product strategy and the roadmap for two user groups: freelancers paid in foreign currency and everyday users who send money and pay bills.
- Write product requirements and work with design and engineering on sign-up, identity verification, PIN setup and account recovery flows.
- Wrote five product and compliance policies before launch: privacy policy, terms of use, risk disclosure, acceptable use and AML/CFT.
- Lead compliance onboarding with financial partners and assess providers on cost, fit and risk.
- Coordinate a cross-functional team across design, mobile and web engineering, and finance.

PROJECTS

Abara Care: chronic-care feature for a telemedicine app

Product study and working prototype | 2026 | abara-health-flow.lovable.app

- Reframed a patient drop-off problem as a gap in continuity of care, using research on why people leave health apps and how patients access care.
- Wrote the PRD (three core features, user stories, success metrics and guardrails) and built a clickable prototype.

Pennywise: personal finance coach for young professionals

Product study | 2026

- Wrote the market brief and PRD using national survey and inflation data, and scoped the MVP to the two user needs that mattered most.
- Replaced a vanity metric with behaviour-based success metrics and added a 24-hour human-review safety metric.

SKILLS

- **Product:** Product strategy, roadmapping, PRDs, user research, prioritisation, success metrics, Agile
- **People:** Stakeholder management, cross-functional collaboration, team leadership, communication, negotiation
- **Design:** User flows and wireframes in Figma, prototyping
- **Risk & compliance:** KYC/KYB, AML/CFT policy, privacy policy, vulnerability assessment, penetration testing
